

I don't think
college is for me...

Give us a chance
to show you it is!

Many seniors benefit from some additional education and/or training after high school. Before ruling out college, give us a chance to show you why it might work for you.

I get bored in class

With the chance to choose what you want to study and when, you're far more likely to be interested in your classes. You'll also have opportunities to learn by doing, professors who typically work in the fields they teach and classmates who share your interest!

I can't afford it

There are financial aid, private scholarships and work-study positions to apply for, and our tuition payment plan allows you to pay over a few months instead of all at once.

My grades aren't good

You don't need a minimum grade point average to be admitted to Macomb. Once you're enrolled, we offer free tutoring, reading and writing assistance, and success workshops to help you keep your grades and confidence high.

I have no clue about a career

Our free career testing and bundled Area of Interest options will give you valuable career insights. And our counselors, advisors and Career Services team are always available to answer a question or lend a hand to help you discover what it is that you really want to do.

I like to work with my hands, not in an office

We offer many degree and certificate programs in the skilled trades, not to mention culinary arts, construction, land surveying, automotive technology and more!

You don't need college to get a job

Those with a college degree, occupational certificate or who have mastered a skilled trade are more likely to get and keep a job. And they get paid better—approximately \$25,000 more a year than someone with only a high school diploma.

I don't know how to get started

Our understanding counselors and advisors have helped hundreds of high school seniors just like you find the right career path.
