Previous Experience:

- City of Roseville Water Department – Intern collecting data for GIS mapping system
- The Christman Company – Project Planning Intern on the estimating team
- SME, Inc. – Staff Engineer

A bit about me:

My decision for college was between Michigan Tech and Michigan State. Both programs were very good and I had a lot of friends that ended up going to Michigan State. I finally decided I would go to Michigan Tech. Even though it is very far away and I was away from friends and family I could not have been happier with my decision. It was a rough transition but being on my own taught me a lot and I made some amazing friends since I have been up here. I am super excited that I will be receiving my Master’s degree by spring 2020. I am now looking for a full time position to start my “adult” life! I look forward to helping out any MMSTC student that needs it! I met alumni up here that were really great to have

around. MMSTC was an amazing experience for me and I still keep in touch with a lot of my friends from there. Please feel free to contact me!

I'd be a great contact for you if you are interested/have questions in...

- Michigan Tech
- Civil Engineering Majors
- What it is like being far from home
- Scholarships
- Smaller school/campus experience
- Working for a general contracting company
- Having a campus job
- Roommates
- The Fundamental Engineering Exam/Professional Engineering Exam or License
- College life in general
